Chicago, Illinois*

Revision/Salvage/Oncologic Reconstruction

Combining unparalleled modularity and surgical latitude, the Biomet Orthopaedic Salvage System (featuring the Finn® Rotating Hinge Knee) is a benchmark as the surgeon's choice when a patient exhibits significant bone loss, ligamentous deficiencies, primary or metastatic bone tumors, connective tissue disorders or has undergone multiple revision arthroplasties.

- Distal femoral reconstruction
- Proximal tibial reconstruction
- Proximal femoral reconstruction
- Total femoral replacement
